The Company intends to apply for admission of its New Shares and existing ordinary shares to be listed on the Madrid, Barcelona, Bilbao and Valencia Stock Exchanges (respectively, the "**Admission**" and the "**Spanish Stock Exchanges**") for trading through the Automated Quotation System (*Mercado Continuo*) of the Spanish Stock Exchanges.

INFORMATION ON THE COMPANY

Opdenenergy is a well-established and fully integrated independent producer of sustainable energy, focused on the production of solar photovoltaic ("**PV**") and onshore wind power, present in selected stable and fast-growing Tier I renewable energy markets. In particular, Opdenenergy is present and has pipeline projects in five markets in Europe (Spain, Italy, United Kingdom, France and Poland), in the United States and in three markets in Latin America (Chile, Mexico and Colombia). Opdenenergy's vertically integrated approach, with in-house expertise and integrated capabilities across the entire value chain, ensures invaluable understanding and control over the projects' development, structuring, financing, construction, and operation and maintenance.

As of the date of this announcement, the Company has a portfolio of operating, Under Construction and Pre-Construction renewable energy plants with a gross installed capacity of c.2.4 GW, out of which c.783 MW correspond to Pre-Construction assets. The Company's operating and Under Construction plants include 34¹ solar PV plants and one onshore wind plant, with an aggregate gross

¹ One of these 34 plants is Puglia solar PV plant which consists of seven separate plants. The seven solar PV plants comprising Puglia are held through three different SPVs and are considered to be a single solar PV plant for management purposes.

installed capacity of c.1,586 MW (including plants where the Company owns a non-controlling interest) and an attributable installed capacity of c.1,470 MW. Approximately 902 MW of gross installed capacity correspond to 20 wholly-owned solar PV plants located in Spain and c.100 MW correspond to one solar PV plant located in the United States, all of which are Under Construction. The remaining gross installed capacity of c.584 MW (c.468 MW on an attributable basis) correspond to operating plants. In addition, the Company has an attractive growth profile with a pipeline of projects with an aggregate potential gross targeted installed capacity of c.10.8 GW, of which c.1.7 GW relate to projects marked as Advanced Stage and c.1.1 GW relate to projects categorized as Farm-Down².

The Offering represents the next step in Opdenenergy's long-term development and ongoing transformation to become a large-scale geographically diversified independent power producer ("IPP") and allows Opdenenergy to fund its business plan until 2025. The Company intends to use the net proceeds of the Offering to contribute towards the equity portion of the capital expenditures associated with the development of its target for 2025, which is to reach a capacity of c.3.3 GW of assets in operation and Under Construction ("the **2025 Target**"). This means more than doubling its current gross operating and Under Construction capacity and increasing its actual operating capacity by approximately six times (c.6x).

Opdenenergy has a clear vision and a well-defined strategy oriented towards the achievement of its medium-term targets while promoting a sustainable development. The Company is focused on attractive Tier I countries, creditworthy investment-grade off-takers, and hard currency-denominated (or hard currency-linked) energy sales, which are supported by long-term power purchase agreements ("PPAs") or other types of remuneration arrangements such as public remuneration plans with fixed or stabilized remuneration prices (or a combination thereof), for most of its power production, providing the Company with significant visibility and stability in its future revenues. In particular, the Company has c.2,658 MW of assets with secured long-term PPAs, of which c.584 MW correspond to their operating assets and c.2,075 MW to their Under Construction, Pre-Construction and two assets within their pipeline.

Opdenenergy has a proven track-record in executing renewable energy projects and delivering targets. Since its inception in 2005, they have successfully executed multiple M&A and financing agreements, of which it is worth noting the Bruc Transaction which includes the sale of 1,101MW at ready to build stage ("RtB") (subject to the satisfactory of certain conditions to be completed).

The Company is led by a dynamic, highly qualified and experienced management team, with over 60 years of combined experience in the sector and a proven track-record identifying and executing new market and development opportunities, that has been directly responsible for the growth experienced by Opdenenergy over the past few years.

Environmental, social and governance ("**ESG**") is at the core of Opdenenergy's strategy and its key initiatives position the Company to play a very active role in the ESG transition, providing an opportunity to invest in an asset that will contribute positively and actively to the transition towards a decarbonized world while targeting sustainable long-term returns. Opdenenergy is committed to maintaining best-in-class corporate governance practices to ensure a sound, long-term oriented governance. In 2021, the Company designed its "Sustainability Master Plan" which sets out its ESG

² This category falls into the Pipeline because it includes assets that are expected to be transferred once these reach ready-to-build status, and thus do not contribute to Opdenenergy's 2025 Target, which is to reach a capacity of 3.3 GW of assets in operation and Under Construction.
