

Opdenenergy reaches 278MW transferred in the Bruc Energy transaction

- **The agreement includes a new transfer of two additional solar projects in Soria totaling 87MW**
- **These two projects are in addition to the 191MW already transferred to Bruc Energy during the last months**
- **Opdenenergy expects to reach 372MW transferred soon through a new 94MW plant to be transferred soon and continues to make good progress on the different milestones of the agreement to fully transfer the assets during fiscal year 2022 and 2023**

Madrid, October 27, 2022. Opdenenergy, an independent renewable energy producer, has signed with Bruc Energy the transfer of two new additional solar PV projects with a total capacity of 87MW located in the town of Trevago, Soria. The transfer of the plants takes place after obtaining a favorable environmental permit. This latest transaction is part of the agreement signed by Bruc Energy in August 2021, which includes the sale of a portfolio of 20 projects with a total capacity of 1,101MW located in different parts of Spain.

These 87MW transferred are in addition to the 191MW formalized to date, bringing the total to 278MW already transferred after obtaining the favorable environmental permit.

In addition to these 278MW transferred, Opdenenergy has received the favorable environmental permit for an additional 94MW and has initiated the relevant procedures prior to the transfer to Bruc Energy. This will allow it to reach 372MW transferred in the coming months.

The company continues to make good progress on the different milestones of the agreement to transfer the totality of the assets during the 2022 and 2023 fiscal years.

Luis Cid, CEO of Opdenenergy, stated: *"The successful completion of the closings associated with the Bruc Energy transaction is a demonstration of our execution and commitment to our investors and partners. It also reflects the quality of our projects and enhances the value of the other projects currently under development."*

PRESS RELEASE

About Opdenenergy

Opdenenergy is an independent renewable energy producer, or IPP, in Europe, the United States and Latin America with more than 15 years of experience. The company develops, builds, finances, manages and operates high quality renewable energy projects in several countries. Opdenenergy has a portfolio of 1.6GW of assets in operation and under construction, with an additional 400MW under construction in the near future. In addition, Opdenenergy has an additional portfolio of projects in different stages of development of more than 12GW that support its growth strategy.

Opdenenergy plays an important role in the energy decarbonization in the different countries in which it operates. It is present and has projects in the pipeline in five European markets (Spain, Italy, United Kingdom, France and Poland), in the United States and in three Latin American markets (Chile, Mexico and Colombia).

Opdenenergy has been listed on the Spanish continuous market since July 2022.
